# PROSPHERE

## US General Services Administration (GSA)

# PROFESSIONAL SERVICES SCHEDULE (PSS) CONTRACT VEHICLE

### OVERVIEW AND BENEFITS

GSA PSS is an indefinite delivery/indefinite quantity (IDIQ) multiple award schedule that provides direct access to both simple and complex fixed-price or labor-hour professional services.

The schedule offers federal agencies access to more than 3,300 experienced contractors who provide a range of commercial professional services at discounted and competitive prices.

PSS allows federal agencies to:

- Use simplified acquisition procedures to issue a Request for Quotation (RFQ) using GSA's eBuy solicitation system or an agency's procedures.
- Bring a wide variety of industry partners to the negotiating table through the use of unique Contractor Teaming Arrangements.
- Customize terms and conditions in task orders or through Blanket Purchase Agreements to meet specific requirements.
- Ensure adequate participation by small businesses, including setting aside RFQs for various socioeconomic subgroups.
- Save time by using the streamlined procurement procedures of FAR Subpart 8.4. (All required FAR terms and conditions are incorporated into the contract.)

### SERVICE AREAS

The PSS schedule allows for a wide range of services that are divided into the following subcategories:

- Business Administrative Services
- Environmental Services
- Financial Services
- Identity Protection Services
- Language Services
- Legal Services
- Logistical Services
- Marketing and Public Relations
- Technical and Engineering Services (non-IT)
- Training

**5 YEAR**

# DELIVERING REAL-WORLD SOLUTIONS

ProSphere Tek, Inc. (ProSphere) is a market-leading, mid-tier technology integrator that delivers digital modernization services and technical solutions to meet the needs of our federal government clients. Our primary service areas include Enterprise IT Operations & Support, Software Development & Engineering, Cyber Security, and Technical Services & Program Management.

**ENTERPRISE IT OPERATIONS & SUPPORT:** Whether it is infrastructure management, service desk, or cloud migration, ProSphere engineers can help architect and support enterprise infrastructure. We support datacenter operations using technologies such as VMWare vSphere, Microsoft Hyper-V. Our engineers migrate business services to public clouds such as Microsoft Azure or Amazon Web Services. ProSphere also has vast experience with IT Service Management, using frameworks such as ITIL to support the entire infrastructure.

**SOFTWARE DEVELOPMENT & ENGINEERING:** ProSphere engineers design architecture for new systems, modernize legacy systems, and provide sustainment and integration services using the Test-Driven Development (TDD) process. Our approach factors in best practices such as the SAFe® methodology, and ensures quality-driven products through Software Quality Assurance (SQA) and IV&V procedures.

**CYBER SECURITY:** Our clients depend on the stable, safe, and highly available infrastructure in which they operate. Systems must comply with existing and developing security standards—from design to operations. ProSphere provides clients with the latest in information assurance, vulnerability management, and penetration testing to address these needs. Our engineers can also help a client prepare for Risk Management Framework (RMF) Certification and Accreditation.

**TECHNICAL SERVICES & PROGRAM MANAGEMENT:** We deliver management, technical, and administrative services in support of high-priority Federal IT initiatives, including Technical Program Management Office (PMO) Support and Capital Planning and Investment Control (CPIC). We leverage industry standards and practices, including Project Management Institute's (PMI's) procedures for program management and the Agile methodology.
