DELIVERING REAL-WORLD SOLUTIONS

ProSphere Tek, Inc. (ProSphere) is a market-leading, mid-tier technology integrator that delivers digital modernization services and technical solutions to meet the needs of our federal government clients. Our primary service areas include Enterprise IT Operations & Support, Software Development & Engineering, Cyber Security, and Technical Services & Program Management.

ENTERPRISE IT OPERATIONS & SUPPORT: Whether it is infrastructure management, service desk, or cloud migration, ProSphere engineers can help architect and support enterprise infrastructure. We support datacenter operations using technologies such as VMWare vSphere, Microsoft Hyper-V. Our engineers migrate business services to public clouds such as Microsoft Azure or Amazon Web Services. ProSphere also has vast experience with IT Service Management, using frameworks such as ITIL to support the entire infrastructure.

SOFTWARE DEVELOPMENT & ENGINEERING: ProSphere engineers design architecture for new systems, modernize legacy systems, and provide sustainment and integration services using the Test-Driven Development (TDD) process. Our approach factors in best practices such as the SAFe® methodology, and ensures quality-driven products through Software Quality Assurance (SQA) and IV&V procedures.

CYBER SECURITY: Our clients depend on the stable, safe, and highly available infrastructure in which they operate. Systems must comply with existing and developing security standards—from design to operations. ProSphere provides clients with the latest in information assurance, vulnerability management, and penetration testing to address these needs. Our engineers can also help a client prepare for Risk Management Framework (RMF) Certification and Accreditation.

TECHNICAL SERVICES & PROGRAM MANAGEMENT: We deliver management, technical, and administrative services in support of high-priority Federal IT initiatives, including Technical Program Management Office (PMO) Support and Capital Planning and Investment Control (CPIC). We leverage industry standards and practices, including Project Management Institute's (PMI's) procedures for program management and the Agile methodology.
